

Consent to the storage of data

For the vehicle used by me [please specify here] I have purchased or retrofitted the caravan control unit. This control unit, together with the My Hobby app, makes it possible to control vehicle functions via a mobile terminal and to determine the location of the vehicle.

In this context, the following data are collected by the contract data processor of the company Hobby Wohnwagenwerk Ing. Harald Striewski GmbH, namely the company Mobile Connect AB: My name, contact data, e-mail address and customer number as well as ICC ID (Integrated Circuit Card ID), IP and Mac addresses, CIBUS status, GPS position of the vehicle push messages as well as contract data for my vehicle.

In each case the last GPS position of the vehicle is stored, as soon as a new position is transmitted, the former position is deleted.

The data is used to fulfill the contract, namely to operate the controller and determine the vehicle's location.

I hereby agree to the collection, processing and use of the above data, in particular the data on the location of the vehicle. I am aware that further storage can be terminated at any time by removing the SIM card from the control unit.
